

Implementation of an ED Atrial Fibrillation and Flutter Pathway

Improved Rates of Appropriate Anticoagulation

48.6% → 70.2%

(Percent of Patients)

Shorter ED Length of Stay

262 → 218

(Minutes)

Decreased 30-day Revisit Rates for CHF

13.2% → 2.3%

(Percent of Patients)

Take Home Message: AF pathways can reduce system resource use and improve patient oriented outcomes
